# Universal Barn Cleaner

**GENERAL PURPOSE CLEANER AND DEODORIZER**

## Product

BioSentry® Universal Barn Cleaner is a biodegradable, effective general-purpose cleaner for use in poultry houses, swine units, livestock barns, farm premises and hatcheries.

BioSentry® Universal Barn Cleaner is amphoteric in nature and is compatible with hydrogen peroxide, BioSentry® BioQuat™ 20 Disinfectant, BioSentry® 904 Disinfectant or other quaternary disinfectants.

Cleaning and disinfection in one step is an inadequate procedure for areas of high soil loads, hard water areas and areas having porous surfaces. A two-step program of proper cleaning followed by proper disinfection is required for these areas. Use of BioSentry® Universal Barn Cleaner for cleaning, followed by an effective BioSentry® disinfectant is an efficient, economical approach to a two-step cleaning and disinfection program.

## Physical Properties

<b>State</b>	Liquid
<b>Colour</b>	Green
<b>Odour</b>	Sassafras
<b>pH, 25°C</b>	12.5
<b>Freezing Point</b>	0°C

## Notes

While this cleaner will work in cold water, it performs best in warm or hot water.

Please refer to MSDS sheet

## Benefits

- Contains amphoteric detergents
- Compatible for use with phenolic, quaternary, chlorinated, peroxide and iodine disinfectants
- Quickly removes grime, grease, protein and fatty soils
- Rinses free without streaking
- Use for foam, high pressure or manual cleaning
- Works in hot or cold water
- Safe for all wettable surfaces

## Dilution Rates

Task	Dilution
General Cleaning <i>Adjust depending on soil load</i>	8-24 mL/L
Foam Cleaning	16-24 mL/L
Farm Premise Cleaning	2-4 mL/L
High Pressure Cleaning	2-8 mL/L

## Format

18,9 L
