Global Pork Update & Outlook

November 21, 2019 Brett Stuart

Outline

- 2020: ASF Drives Global Protein Markets
 - China situation
 - Where is China Demand in the Markets?
 - 2020 pork forecasts
- Watchlist

Our Reporting on ASF

<u>2018</u>

- <u>August</u>: ASF found in China (8/3); we host an ASF webinar
- <u>September</u>: We warned that ASF is a "global pork game-changer" and that government efforts to control the spread would prove inadequate.
- <u>October</u>: We identified massive government ASF under-reporting.
- <u>November</u>: We suggested that control is not possible in China. We identified scenarios including large pork bookings for frozen boxed carcasses.
- <u>December</u>: We stated that ASF's "toll on global pork and protein markets will be staggering".

<u>2019</u>

- January: After a China trip, we identified mass liquidation and warned of impending price surges.
- <u>February</u>: We noted a strong contra-seasonal China hog price move indicating a future supply gap.
- <u>March</u>: I returned from China and sent my trip report to our clients stating that we expect massive losses, at least 30% already, and offered confirmation from contacts in China that losses were staggering..

Why ASF is A Global Protein Game Changer?

- The virus is very strong (hard to kill)
- Mortality rates > 95%
- There is no vaccine
- 75% of the world's hogs are now threatened
 (EU and Asia)
- Chinese pork supplies = 20% of total global meat/poultry
- The losses in China and Vietnam are massive

ASF – Current Situation

- Asia **falling**:
 - New cases in the Philippines and South Korea
- Europe <u>fighting</u>:
 - Belgium seeing reduced cases; can they contain it?
- Everyone **<u>fearing</u>**:
 - Measures being imposed globally
 - The virus knows no borders

Global AgriTrends

Currently in China

- > 50% of the swine herd is gone
 - >220 mil hogs, >22 million sows
 - <u>One-fourth of the global swine herd is gone</u>
- And the disease rages on:
 - No vaccines, probably for years
 - Repop success stories are scarce
 - Hog profits are above \$300/head
 - If you can keep hogs alive for 10 months
 - Everyone wants to "roll the dice"; high return = high risk
 - These desperate moves are making ASF control less likely

China's Shortages Are Now Here

- Social media reports of <u>shortages</u>
- Contacts "on the ground" ...
- Gov't actions:
 - Direct provincial governments to increase pork output
 - Released 30,000 mt of frozen pork from storage (5 hours of national consumption)
- Food inflation is now soaring
- But consumer pressure is different there...

China Economy

Hong Kong protests and US trade war no longer China's top priorities as spiralling pork prices dominate agenda

The REAL Question

How/When Does China Recover?

- I don't think they do, not to 100%
 - They've never been globally competitive in pork
 - Large-scale farms are now 15% of production
 - Finishing space is the bottleneck
- 5+ years, vaccine found
- 10 years
 - China has rebuilt 70% of prior production
 - 30% outsourced
 - 16 mmt? That is 133% of current U.S. production

All Roads Lead to China

The ASF Waves

- <u>Wave 1</u>: Chinese domestic markets, all protein
- Wave 2: Global protein exporters...
 WITH direct access to China (EU pork, non-U.S. beef)
- <u>Wave 3</u>: Global protein exporters...
 - WITHOUT direct access to China
 - 'Backfilling' exports into secondary markets
 - U.S. beef to Japan, Korea, others
 - EU, US, Canada pork into Japan, Korea, Australia
- <u>Wave 4</u>: Secondary domestic markets of exporter nations
 - U.S. chicken breasts, global tilapia, etc...

Global Implications - ASF Expansion Opportunities: Global Protein

	China	EU	U.S.	Brazil

Where is China Demand in the U.S./Canada Markets?

IA/MN Carcass Price & Futures

"Step Right Up"

"Can you predict June LH futures within \$100/cwt?"

How about a range from \$50 to \$150?

If so, the futures market will give you **\$230** today; if you're right, you keep it*

* But you front the losses above \$150 and below \$50

U.S. Hog Prices

Global AgriTrends

Source: USDA

U.S. Hog Prices

Global AgriTrends

Source: USDA

U.S. Hog Prices

U.S. Hog Markets and CHINA

- U.S. pork production (past 10 weeks): +6.3%
- U.S. pork cutout last week: +26%
- U.S. ham prices up +97% from a year ago
 Up +70% in 5 weeks
- U.S. pork exports up +17% in Q3

 Likely well above that level now in November

• China is having an impact on the markets.

Canada Pork Exports

2020 Pork Forecasts

China & Hong Kong Pork Imports

Politics: The "X" Factor

- How do the 50% retaliation tariffs affect US pork?
- The "Art of the Deal?"
 - Election:
 - China is a great "punching bag"...
 - China is also very patient...
- Chinese pressure to ensure supplies is <u>soaring</u>

U.S. Pork Export Forecast

Global AgriTrends

Source: USDA/ERS, AgriTrends forecasts

U.S. Pork Export Forecasts 2,600 2018f 2019f 2020f 36% 2,400 2,200 35% 33% 2,000 28% 15% 1,800 17% 1,600 1% -5% Mil Lbs 1,400 1,200 1,000 2020f: 8.0 bil lbs, 28% 800 2019f: 6.3 bil lbs, 7% 600 400 200 0

What If We Find ASF in N. America?

- Export markets close instantly
 - Some may regionalize within weeks
 - Canada, Mexico, U.S.?

- At least a couple weeks to investigate and determine if it is contained
- But for weeks we have <u>WAY too much pork</u>
 US exports 23% of production, Canada 68%
- And many export markets stay closed

– Even with ASF in China? YES

• Massive culling is not the risk; we could manage ASF. Exports are the risk

Watchlist

• ASF

- China live hog and pork prices
- EU prices, global pork exports
- Further ASF spreading (EU, Asia, ?)
- Caution warranted to any commodity with exposure to China's pork gap

- All global protein, soybeans?

• U.S. pork, poultry, beef access to China...

The Future...

"... it is not the most intellectual of the species that survives; it is not the strongest that survives; but the species that survives is the one that is able best to adapt and adjust to the changing environment in which it finds itself." - Charles Darwin

Adapt... or Perish
