## Things to Consider....

April 6, 2021

The latest US pork exports reported for February fell 2.3% from the previous month, recording a 4-month low, and is down 10.1% from last year's record high for the month historically. Seasonally, February can be a lower export month than January as shown by years other than 2020.

Mexico recorded the largest drop from previously reported, down 18.8 million pounds in a seasonal move from January. Several other major destinations for US pork recorded lessened amounts of US pork for the month of February, such as South Korea, China, Panama and Japan. South Korea fell 7.7 million pounds for February, while Panama declined 2.5 million pounds and Japan was down 1.9 million pounds. Mainland China fell 4.1 million pounds, while Taiwan edged lower, and Hong Kong climbed modestly higher for a combined total China\* decline of 3.8 million.

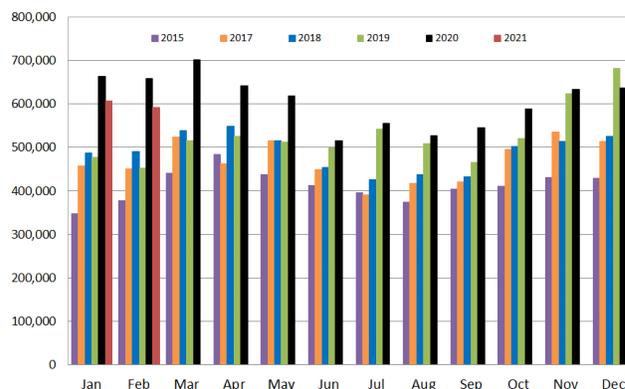

Offsetting some of these declines overall were increases of US pork to Colombia and the Philippines, up 7.6 and 7.5 million pounds, respectively. The quantities of US pork destined for Colombia are among the monthly highs recorded historically, while the Philippines recorded the highest monthly amount imported from the US since March 2010 at 20,622 million pounds. Countries such as Canada, Australia and New Zealand also recorded notable increases for February, each up more than a million pounds from last reported. Compared to a year ago, China\* has seen a decline of roughly 6% while the "other countries" category gained about 4%.
